Model 200XP

12" CAPACITY DISC-STYLE CHIPPER

The Model 200XP is built like our popular Model 150XP with the same 14" x 17" chipper opening, but has a faster chipping speed (120 FPM). The 200XP is the most popular chipper of utility line maintenance contractors because of its ability to quickly dispose of brush and to handle larger stems and branches.

Built to Last

All steel components on the 200XP are welded together for durability and longevity.

Slide Box Feed System

This system with down pressure springs eliminates the areas where material can hang up in the feed system.

Larger Infeed

The 200XP features a large infeed hopper opening of 29" high by 45" wide.
